

The background of the slide is a light blue color. It is populated with numerous stylized, flat-design illustrations of people of various ethnicities, ages, and genders. These figures are scattered around the central text bubble, some appearing to dance, walk, or pose. The central text bubble is white with a soft, rounded shape. Inside this bubble, the main title 'Did We Really Desegregate?' is written in a large, bold, dark blue sans-serif font. Below the title, the subtitle 'Predicting School Zones with Demographic Data' is written in a smaller, regular weight of the same font and color.

Did We Really Desegregate?

Predicting School Zones
with Demographic Data

The image features a light blue background with a large, white, irregular speech bubble in the center. Inside the bubble, the text 'The So What?' is written in a bold, dark blue, sans-serif font. Three stylized, flat-design human figures are positioned around the bubble. One figure, a woman with blonde hair wearing an orange tank top and brown pants, is perched on the top right edge of the bubble. Another figure, a woman with brown hair wearing an orange long-sleeved shirt and dark blue patterned pants, is standing to the bottom left of the bubble. The third figure, a man with dark skin wearing a yellow long-sleeved shirt and brown pants, is walking towards the bottom right of the bubble.

**The So
What?**

'This act of rezoning... is just one tiny step towards righting some of those wrongs....we have a long way to go. Actions, actions, actions – that is what is necessary and needed. '
